There are well over 220 Doosan service and sales locations operating in Canada and the United States. What's more, there are more than 90 independent dealers moving forklift materials and materials handling equipment. This network helps Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably comprises of 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various vehicle designs vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift company in the North American market, due to their reliability in maintaining a high degree of consumer service quality and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division based in Cleveland has a professional team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a nationwide equipment expansion venture. Early sales of this manufacturing equipment focused on large business communities, the armed services and on state-run companies. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education became the new focus for improving quality and product development.

Home-based forklift trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a position of significant expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the highly competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a global sales system and started exporting designs they had established through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international markets.
