

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started out on a cross country RV expedition. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

All through their trip, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could swiftly and safely elevate people in the air to accomplish maintenance and other construction services.

After their return from vacation, John set up a joint venture with two of his friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design elements of that original lift into current models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into many different international markets and continues to develop new equipment to ensure that clients are able to become safer and more efficient within their workplace.
