

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts can be purposely marked to be used in hazardous locations. A marked lift truck denotes the design has met the minimum standards of ANSI/UL 558 meant for engine powered trucks or ANSI/UL 583 intended for electric lift trucks for the type of label put.

The use for labels intended for lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Check with your local insurance carrier and Fire Marshall for more information regarding the approved uses of industrial powered trucks in your application.

If the lift truck has been found to meet the outlined standards, the following labels may be put. A marked truck would have the type description put on the forklift nameplate and would have one of the following labels placed.
