

Aerial Work Platform

Aerial Work Platforms - There are many accessories used for forklifts that can be utilized to be able to help expand the capabilities of your forklift and allow you to lift things, handle materials with greater ease or to finish clean-up tasks.

Many of the attachments are specially designed to be able to fit on the forks themselves. Blade extensions for instance, are used if you require a lot more fork length, that increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded attachments are another kind utilized whenever transporting rolled material to be able to make certain it does not roll off of the traditional flat forks.

Examples of lifting accessories comprise pivoting and telescoping crane or boom attachments. They could come in quite a few various kinds and are most often used for transporting metal bars, lumber, poles and other types of bulky items. Other accessories such as other kinds of hooks and hook plates are offered so as to carry stuff making use of a chain or sling. Slab lifters and magnetic lifters are other objects which could be used with hook attachments. Slab lifters are specialized accessories which are utilized for lifting a variety of materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which connect to your forklift in order to make transporting rolls of carpet easier. The accessory hooks onto the lift truck's blades and has a pole that goes through the center of the carpet roll.

There are many kinds of forklift attachment designed for facility maintenance such as snow forks. These industrial forks could be attached to front end loaders and used for transporting materials like dirt, and mulch as well as snow. Other common cleanup accessories comprise standard sweepers and magnetic sweepers. Standard sweepers comprise a broom which the forklift blades hook onto for sweeping large spaces like parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up easy and fast.

A material spreader is one more lift truck attachment which is usually utilized at facilities. These spreaders are handy for various applications like for instance spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Another optional lifting accessory are work platforms. These could be utilized by a lot of different businesses day by day. Platforms may differ in size from 36" x 36" to up to 60" x 60". A few units may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location utilizing the lift truck. Larger platform models have additional space for personnel to be able to carry tools and other essential items intended for the task. Often work platforms are constructed of poly material or steel.
